

Important Market Questionnaire – please complete immediately

Over the past two years, New Hampshire’s timber markets have experienced several dramatic shifts. Specifically, the loss of markets for low-grade timber and sawmill waste.

Several key N.H. policymakers are seeing the impacts from the loss of these markets on businesses and timberland owners in their communities and are looking at options to help shore up our existing low-grade markets and create opportunities for the idle biomass to come back on-line or be re-purposed.

These policymakers are asking the NHTOA to quantify the impacts the loss of low-grade markets is having on N.H. forestry and logging companies, landowners, and overall forest health. To assist the NHTOA with this effort, please take a minute to complete answer the following questions and return it to Jasen Stock at jstock@nhtoa.org by November 20, 2020.

Are you a (check one): landowner _____ forester _____ logger _____
 Other _____ (describe) _____

(Answer to the best of your ability – estimates are fine) November 2018 November 2020

Number of employees _____ _____

Annual revenue _____ _____

Acres you manage or harvest annually _____ _____

Acres you were unable to manage due to lack of low-grade markets (i.e. timber sales shelved) _____ _____

Total number of timber sales _____ _____

Acres where you had to change the harvest prescription due to lack of low-grade markets _____ _____

Volume of biomass produced (tons) _____ _____

Volume of pulpwood produced (tons) _____ _____

Volume of sawlogs produced (board feet) _____ _____

Other changes experienced from 2018 to 2020 (i.e. what are you currently doing with low-grade - please describe) _____
